AGRA SPHERE

ALL-NATURAL WASTE SYSTEM TREATMENT SPHERE

Formulated to reduce sludge build-up, prevent crusting, and reduce flies and odors.

Bioverse, Inc. • 1401 Apache Drive • Pipestone, MN 56164

Product Attributes

- 24/7 Activation
- Patented Time Release Technology
- Proprietary Microbial Isolates
- Easy to Use
- Absolutely No Mixing
- Reduces Sludge Build-up
- Prevents Crusting
- Reduces Flies and Odors
- Safe, Natural & Biodegradable

Contents

Six (6) Biodegradable AGRA SPHERES

- Each sphere activates, treats and maintains 60,000 gallons of contained deep pit waste and sludge.
- Also very effective for lagoon treatments

Biodegradable • Natural • Effective

DIRECTIONS

To calculate storage volume, measure, in feet, and multiply: **Length x Width x Depth x 7.5 = Total Gallons**

Deep Pit Containment

Deep pits containing less than 12 inches of retained bottom sludge

- Add 1 AGRA SPHERE to the storage system for each 60,000 gallons of capacity
- Repeat every 180 days
- Place evenly throughout the system

Deep pits containing more than 12 inches of retained bottom sludge

- Add 1 AGRA SPHERE to the storage system for each 60,000 gallons of capacity
- Repeat every 90-120 days until sludge levels are reduced to less than 12 inches
- Once depths are reduced to less than 12 inches, repeat every 180 days

Crusted Systems

- Do not add AGRA SPHERES when containment areas have firm, heavily-crusted accumulations
- Storage areas with heavy crust and large sludge accumulation require treatment with ACTIVATOR PLUS prior to placement of the AGRA SPHERE
- Follow label directions and add AGRA SPHERES once crust has been liquified

All systems may need treatments to return the storage system to normal operational efficiency. Contact Bioverse's service management team for additional assistance.
