Tylan Soluble

Tylosin Tartrate

Equivalent to 100 g tylosin base

Indications

Chickens: As an aid in the treatment of chronic respiratory disease (CRD) associated with Mycoplasma gallisepticum sensitive to tylosin in broiler and turkey flocks. For the control of CRD associated with Mycoplasma gallisepticum sensitive to tylosin at the time of vaccination or other stress in chickens. For the control of CRD associated with Mycoplasma synoviae sensitive to tylosin in broiler chickens.

Turkeys: For maintaining weight gain and feed efficiency in the presence of infectious sinusitis associated with Mycoplasma synoviae sensitive to tylosin in broiler turkeys. As an aid in the treatment of chronic respiratory disease (CRD) associated with Mycoplasma synoviae sensitive to tylosin in turkeys. For the control of porcine proliferative enteropathies (PPE, ileitis) associated with Lawsonia intracellularis when followed immediately by TYLAN Type A medicated article in feed. For the control of porcine pleuropneumonia-like enteropathogens (PPE, ileitis) associated with Lawsonia intracellularis when followed immediately by TYLAN Type A medicated article in feed.

Honey Bees: For the control of American Foulbrood (Paenibacillus larvae).

Swine: For the control of swine dysentery medicate with 250 mg tylosin per gallon in drinking water for 3 to 10 days, depending upon severity of infection. Alternatively, medicate with 250 mg tylosin per gallon in drinking water for 3 to 10 days, followed by 40 to 100 g of tylosin per ton of complete feed (Type C medicated feed manufactured from TYLAN Type A medicated article) for 2 to 6 weeks. For control of porcine proliferative enteropathogens (PPE, ileitis) medicate with 250 mg tylosin per gallon in drinking water for 3 to 10 days, followed by 40 to 100 g of tylosin per ton of complete feed (Type C medicated feed manufactured from TYLAN Type A medicated article) for 2 to 6 weeks. Swine must consume enough medicated water to provide a therapeutic dose. Only medicated water should be available while medicating with TYLAN Soluble.

Directions for Use

Chickens and Turkeys: To assure thorough dissolution, place the Tylan (contents of this jar) in a mixing container and add one gallon of water (3790 mL) to the material. Mix this concentrated solution with water to make 50 gallons (189 liters) of treated drinking water.

Swine: To assure thorough dissolution, place the Tylan (contents of this jar) in a mixing container and add one gallon of water (3790 mL) to the material. Mix this concentrated solution with water to make 400 gallons of treated drinking water resulting in 250 mg/gallon.

Honey Bees: Mix 200 mg tylosin in 20 g confectioners/powdered sugar. Use immediately.

When directed to mix the product with water, always add the water to the powder. Do not pour the powder into the water. Prepare a fresh Tylan solution every three days. When mixing and handling tylan, use protective clothing and impervious gloves.

NOT FOR HUMAN USE

Avoid contact with human skin. Exposure to tylosin may cause a rash.
