3. HAZARDS IDENTIFICATION

ROUTES OF ENTRY: Dermal, Injection, Inhalation, Ingestion

ACUTE EFFECTS OF EXPOSURE: Employee exposure to hazardous components when handled and administered according to the product insert is expected to be minimal. However, sufficient exposure to formaldehyde in large quantities as may be encountered during a large spill or other unforeseeable event, may cause irritation of the upper respiratory tract, eyes and skin. Respiratory tract infection may include burning of the nose throat and coughing. In severe situations pneumonitis, pulmonary edema and even death may occur.

Accidental human injection of inactivated oil emulsion vaccines, those containing adjuvants, diluents and stabilizers may cause serious localized reactions and direct tissue injury. Symptoms of exposure may include significant swelling and pain at the area of injection. Other concerns may involve bacterial infection from needles used in multiple animal vaccinations.

CHRONIC EFFECTS OF EXPOSURE: No chronic health effects associated with the listed products are known, however repeated exposure to formaldehyde, a component of these products, has been known to cause respiratory impairment and has the potential to cause cancer in humans.

CARCINOGENIC EFFECTS: Formaldehyde is considered to be a possible and reasonably anticipated human carcinogen by NTP and IARC, formaldehyde is regulated as a carcinogen by OSHA.

4. FIRST AID MEASURES

SKIN: Wash immediately affected area with soap and water. Contact a physician if irritation occurs.
EYES: Immediately flush with plenty of water for fifteen minutes. Contact a physician.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration and call for medical help immediately.

INGESTION: Seek medical attention immediately.

INJECTION: Remove needle, wash injection site with soap and water, contact physician immediately. Following accidental injection, the vaccine can remain in the focal area near the injection site or disperse itself from the injection site. After physician evaluation, it may be found prudent to remove the foreign irritant.

5. FIRE FIGHTING MEASURES

EXTINGUISHING METHODS: Use Water, Water Mist, Foam or Dry Chemical to extinguish fire. For fighting large fire wear full bunker gear, including SCBA. Keep upwind.

6. ACCIDENTAL RELEASE MEASURES

PROCEDURES IN CASE OF SPILL OR LEAK: Clean up spilled material. Place in a secure container for disposal.

7. HANDLING and STORAGE

STORAGE: Keep refrigerated, 2°C-7°C (36°F-45°F). Protect containers from damage.

SHELF LIFE: See expiration date on product label.

HANDLING PRECAUTIONS: Read and follow all package insert instructions. Protect containers from damage.

8. EXPOSURE CONTROL / PERSONAL PROTECTION

EYES: Prevent eye contact by wearing appropriate eye protection for handling tasks.
