

Chemilizer Parts - Water Motor

The body parts for Chemilizer injectors are made of reinforced plastic. With minimum care and maintenance, they will provide years of service.

Since there is little wear caused by interior moving parts, Chemilizer injectors can be rebuilt using original body parts.

The o-rings are primarily used to seal the parts together and eliminate leaking. Whenever the injectors are taken apart, the o-rings should be replaced. Special care should always be taken when replacing o-rings. If the o-rings do not seal properly there will be leaks.

Manual Reference	Part #	Description	QC Supply Part #
1	FG8023	Twist Air Vent Assembly	120818
2	10095092	Screw 10-32 SS	-
3	31-03130-1032	Nut 10-32 SS	-
4	FG8017	Top By-Part Assembly	120802
5	FG5043	Actuator Arm Assembly	120816
6	10095062	Tension Bands	-
7	FG5042	Pivot Arm Assembly	120805
8	FG24060	Retaining Clip	120845
9	10095054	O-Rings 159 Buna	-
10	FG8013	Top Cap Assembly	-
11	FG5040	Inlet/Outlet Valve Assembly	120827
12	10095058	Inlet/Outlet O-Rings	-
13	FG8020	Outlet Tee Assembly	120826
14	FG8019	Inlet Tee Assembly	120828
15	FG5003	Diaphragm Assembly	120803
16	641755	Screw 8 x 1/2	-
17	10095053	O-Rings 159 Buna	-
18	10095067	O-Rings 009 Buna	-
19	10095078	Piston Clip	-
20	FG8015	Main Bottom Body Assembly	-
21	FG8016	Bottom Body Assembly	120801
22	FG9927	Hose Chemical Assembly	120822
23	FG11001	Jaco Nut 1/4	-
24	41-03265-01	PE Tube 3/16 x 1/4 x 1/16 Chemical	-
24	FG5001	Motor Rebuild Kit	120807
