

Ingelvac CircoFLEX®

Porcine Circovirus Vaccine
Type 2, Killed Baculovirus Vector

Ingelvac CircoFLEX®, the easy one, is a single-dose PCV2 vaccine for protection against PCVAD in swine.

FEATURES

- For pigs as early as 3 weeks of age
Benefit: Early and sustained immunity
- Single, 1 mL dose
Benefits: Less labour costs than 2-dose vaccines
Less stress on pigs
- Highly syringeable
Benefit: Less stress on labour force
- No local or systemic side effects recorded
Benefits: Less stress on pigs and no production setback by vaccine
Less chance of pork being rejected at packing plant
- 21-day withdrawal period
Benefit: More flexibility when shipping your pigs

ADVANTAGES

Ingelvac CircoFLEX® is the only single-dose PCV2 vaccine that can be administered to pigs 3 weeks of age and older. Ingelvac CircoFLEX® is a subunit vaccine that does not utilize any serum products or products of animal origin.

DIRECTIONS

Shake well before use. Using aseptic technique, administer a single 1 mL dose by intramuscular injection.

INDICATIONS

Recommended for the vaccination of healthy, susceptible pigs 3 weeks of age or older as an aid in the reduction of lymphoid depletion, inflammation and virus in lymphoid tissue, and nasal shedding of virus associated with Porcine Circovirus Type 2 (PCV2) infection.

PRECAUTIONS

Store in dark at 2-7° C. Do not freeze. Use entire contents when first opened. Do not vaccinate within 21 days before slaughter. In case of anaphylactic reaction, epinephrine is symptomatic treatment.

PRODUCT INFORMATION

Name	Code	Size
Ingelvac	92422	50 dose/50 mL
CircoFLEX®	92424	100 dose/100 mL
	92426	250 dose/250 mL

Ingelvac CircoFLEX®

- **Early and sustained immunity**
- **Less stress on pigs**
- **Reduced pig handling**
- **Efficacy confirmed in research studies**
