

Exp. Date:
Serial No.:

Indications: For vaccination of healthy, susceptible pigs 3 weeks of age or older as an aid in the prevention of lymphoid depletion, inflammation and colonization of lymphoid tissue, and as an aid in reduction of the magnitude of viremia associated with Porcine Circovirus Type 2 (PCV2). The onset of protection is 2 weeks post-vaccination. The duration of immunity is at least 4 months.

Directions: Shake well before use. Using aseptic technique, administer a single **1 mL** dose by intramuscular injection.

Precautions: Store in dark at 35–45°F (2–7°C). Do not freeze. Use entire contents when first opened. In case of
