

FOR WHEN COOLING IS VITAL.

KUUL VITALITY™ EVAPORATIVE MEDIA

EXPERIENCE THE

EFFECT

WHY CHOOSE KUUL FOR YOUR FARM?

COOLER THAN THE COMPETITION

At industry standard air flow velocity, Kuul Vitality™ evaporative media meets efficiency standards and exceeds pressure drop requirements. Meaning you get cool birds, with lower energy costs.

BEST AVAILABILITY

Every piece of Kuul® evaporative media is made in Center, Texas. When you need replacement media, every day matters. We have inventory on hand, ready to ship faster than anyone in the industry.

TOUGHER THAN THE REST

Kuul Vitality™ evaporative media has been designed with the specific needs of the agricultural industry in mind. Our products are made to provide the optimal cooling experience, while being as tough as possible to take anything your farm can throw at it.

COST OF OWNERSHIP

Not only does Kuul evaporative media last longer, but helps keep your whole cooling system running longer by adding less stress to moving components. Effective cooling, longer lasting evaporative media and low pressure drop. After paying for the investment (1-2 years) those savings are money back in your pocket!

HOW STRONG IS KUUL EVAPORATIVE MEDIA?

We took four pieces of our standard 6" thick Kuul Vitality media with DuraPro and let them fully support the weight of a 4000+ pound truck. The media suffered little to no damage

Have questions? Contact one of our Kuul® evaporative media experts today to get more out of your evaporative media.
The Kuul Effect goes well beyond the products we make.
